

Web Development and Design (ebookers)

Short one line

Design and Usability combined to deliver effective web applications

Case Study Client

Ebookers step 2

Situation

ebookers wanted to develop a set of white label pages for its affiliates – the pages would display ebookers flight and hotel search results on the affiliate website.

Solution

Envigo was able to create the required white label and displayed real time prices using the ebookers XML feed. All features of the search result page – sorting, filtering and selection were available on the white label.

Result

ebookers was able to offer such functionality to its affiliate partners.
